8215 W. 108th Terrace | Overland Park, KS 66210

Medicare Connect offers a low-cost, high-speed, web-based connection to your Medicare fiscal intermediary (DDE, FISS).

As an important step in your revenue cycle management, connecting to the Medicare online system should be simple, cost-efficient, and fast.

GET CLAIMS PAID FASTER

Medicare Connect provides a faster and more reliable connection to the Medicare DDE system. Move to our completely web-based system and leave your slow and outdated phone connection system behind.

ONE LOW MONTHLY RATE

While it might seem a superior connection to the Medicare DDE system would be a costly upgrade, eSolutions is committed to delivering a serious product at a price that's affordable for all providers. Connect to Medicare as much or as little as you like for one low rate.

INCREASE STAFF EFFICIENCY

Connecting faster to the Medicare DDE system means your staff can work faster. Providers who have made the switch report a dramatic increase in the amount of claims they can process in a single day.

SAVE MONEY WHILE MAKING MORE MONEY

Other Medicare connection tools require you to support your own hardware, software and phone lines. eSolutions' completely web-based product allows your staff to work more quickly to process claims, dramatically improving your organization's cash flow, while also reducing your support costs.

A look at our FISS connection

Medicare Connect FISS Window

The image displays the MedicareNavigator web interface and a terminal window. The web interface includes a navigation menu with 'Home', 'Upload', and 'Reports'. A 'Launch Medicare Navigator' button is highlighted with a callout box stating: 'Launch our FISS connection tool with a single click.' The terminal window shows a connection to 'Centers For Medicare & Medicaid Services HPES Enterprise Data Center' via Verizon Direct. It displays a grid of characters (C, M, S) and a warning message: 'UNAUTHORIZED ACCESS TO THIS COMPUTER SYSTEM IS PROHIBITED BY LAW (REF. TITLE 18 U.S.C. SECTION 1030). This is a CMS computer system and is provided for the processing of Official U.S. Government information. All data contained herein is owned by CMS and, for the purpose of protecting the rights and property of CMS, may be monitored, intercepted, recorded, in any manner and disclosed in any manner by authorized personnel. If you are not authorized access to this system you must...'. A callout box at the bottom right of the terminal says: 'Enjoy full, high-speed access to the Medicare FISS system.' The terminal also shows a list of options: 1 CDS, 2 HP, 3 BDC, 4 NONEDC, 5 HP-TPX. The terminal status bar at the bottom shows 'Ready', IP address '158.73.215.10', session ID 'T1VZ0562', and time '00:00:14'.

Medicare Connect features a revolutionary transfer tool that allows you to quickly send and receive 835 and 837, OASIS, MDS, and HIS files.

AFFORDABLE FILE TRANSMISSION

Medicare Connect is billed on a flat monthly rate. We establish this rate with you up front, based on the size of your organization and the volume of files you submit. There are no hidden charges. Just reliable service at a consistent price.

SECURITY FOR YOUR FILES

eSolutions uses safe, HIPAA-compliant encryption methods to ensure that your data doesn't end up where it shouldn't. The integrity of your data is our top priority.

UPGRADE TO INCLUDE OASIS SUBMISSION

For home health providers, our OASIS File Submission service can be added to automatically pick up files from your network and upload them to CMS. The service then returns your validation reports. eSolutions also offers an optional OASIS analysis upgrade.

OPTIONAL MDS REPORTING

Medicare Connect can also transmit MDS files. Skilled nursing facilities can receive all essential MDS reports, from MDS Five Star Ratings of Nursing Homes to Quarterly MDS Previews (of Quality Measure Scores).

MANAGE HIS FILE SUBMISSION

Hospice providers can upgrade their service to include the ability to submit HIS files to CMS. Medicare Connect gives you a snapshot of file transmission history and allows you to view HIS validation reports.

What's the advantage?

The Medicare Connect Package is the premiere connection method to the Medicare DDE system. Used by thousands of providers across the country, this package completely transforms the way you connect to Medicare.

Connecting to the Medicare DDE: Our connection is a faster and more reliable connection to the Medicare DDE system. The ability to simultaneously connect to multiple MAC regions improves efficiency and increase the amount of claims you can process in a single day.

Claims Submission: When you have a complete picture of which claims have been accepted, rejected, and processed, you can quickly prioritize and troubleshoot your workload.

What are the requirements?

While your specific computer hardware and type of Internet connection play a significant role in how fast or slow any web application works, Medicare Connect can be used on virtually any system. The included DDE connection requires a high-speed internet connection, a static IP address, Internet Explorer and power-user rights.

How much does it cost?

Medicare Connect consists entirely of web-based services that are billed on a flat monthly rate. eSolutions establishes the rate based on the size of your organization and the volume of claims you typically handle. Contact us for a cost-of-service estimate for your facility.
